

## Business Domains

Breakdown of Net Sales by Business

### Automotive batteries

#### Japan

We manufacture and market domestic automotive and motorcycle lead-acid batteries. Technology to reduce fuel consumption has made great strides in start and stop and hybrid vehicles. We are developing high-performance, high-quality batteries for these vehicles and launching them in the market.

#### Main Products

#### Overseas

GS Yuasa has 37 overseas bases in 17 countries around the world, with an especially large presence in China and Southeast Asia (mainly in Thailand and Indonesia). We use these bases to manufacture and market automotive, motorcycle and industrial lead-acid batteries.

#### Main Products

### Industrial batteries and power supplies

In addition to lead-acid batteries for electric-powered vehicles such as forklifts and wheelchairs, this business segment covers backup-use industrial batteries and power supplies for social infrastructure such as mobile phone base stations, office buildings, water and sewer systems and power plants, thus supporting our advanced information-based society. We also contribute to environmental protection by supplying power conditioners for photovoltaic power generation, lighting equipment for roads and tunnels, and membrane systems for the effective use of water resources.

#### Main Products

### Automotive lithium-ion batteries

We manufacture and market automotive lithium-ion batteries for eco-friendly vehicles such as electric vehicles, hybrids and plug-in hybrids.

#### Main Products

### Other

We manufacture and market lithium-ion batteries for a wide range of applications, from the deep sea (manned research submersibles) to outer space (satellites and rockets). This segment also includes the development, production and distribution of batteries and power supplies for other specialized uses.
