

# MOTORCYCLE battery

***The world's leading battery manufacturer***

# MOTORCYCLE & POWERSPORT

For motorcycles, scooters, ATV, UTV, jet skis & snowmobiles

## The original equipment manufacturer's choice... then and now.

Motorcycle and powersport manufacturers demand the best so overwhelmingly choose Yuasa batteries. With over 90 years of development, every battery provides the same high performance, quality and reliability as the factory fitted OE original.

Yuasa motorcycle and powersport batteries are precision engineered from premium materials to deliver exactly what enthusiasts want: maximum starting power, superior performance and longer life! They also provide exceptional vibration and impact resistance, proven reliability and reduced self-discharge, for up to four times longer life.

# High performance maintenance free AGM batteries

- Up to four times longer life than competitors' equivalent product
- Fully maintenance free - never add water, but periodic charging is required when not in use
- Premium AGM (Absorbed Glass Matt) technology with no free acid
- Sealed, spill-proof design with multi-angle fitment
- Genuine high-performance OE battery developed to meet motorcycle manufacturers' custom requirements
- Sulphate Stop additive to protect against undercharging damage

## GYZ® high performance maintenance free AGM

A range of premium quality, heavy duty AGM batteries designed to satisfy the performance requirements and durability demanded by power-hungry touring bikes.

- Highest CCA ratings available for exceptional starting power
- Maximum capacity to power multiple accessories
- Heavy-duty flush terminals with built-in brass nuts for multiple connections
- Exceptional resistance to vibration & corrosion
- Supplied filled & ready to fit

## YTZ® high performance maintenance free AGM

These compact, lightweight AGM VRLA batteries deliver greater starting power from a more volume efficient unit.

- Maximum power from minimum space - up to 30% more CCA than standard AGM batteries despite being lighter & more compact
- Can be mounted at extreme angles with no risk of leakage
- Ideal for sport bikes & also motorcycles with a Start - Stop system
- Brass terminals for improved conductivity & optimised performance
- Exceptional resistance to vibration & corrosion
- Constructed with high purity lead
- Supplied filled & ready to fit

## YTX® & YIX high performance maintenance free AGM

A range of high performance AGM VRLA batteries, incorporating extra battery plates with a specialist design for increased cranking amps, less maintenance and longer life.

- Increased cranking power - up to 30% more CCA than standard AGM batteries
- High resistance to vibration & corrosion
- Selected models supplied filled & ready to fit

# Maintenance free AGM batteries

- Up to four times longer life than competitors' equivalent product
- Genuine high-performance OE battery developed to meet motorcycle manufacturers' custom requirements
- Sulphate Stop additive to protect against undercharging damage

## YTX® & YT **maintenance free AGM**

Ideal for motorcycles, scooters, ATVs, ride on mowers and personal watercraft, these permanently sealed batteries do not require topping up. Aside from periodic charging, they remain maintenance free for the life of the battery.

- Increased cranking power - up to 30% more CCA than conventional type batteries
- Superior resistance to vibration & corrosion
- Fully maintenance free once activated
- Premium AGM technology with no free acid
- Sealed & spill-proof design
- Selected models supplied filled & ready to fit

# Conventional batteries

- Up to four times longer life than competitors' equivalent product
- Genuine high-performance OE battery developed to meet motorcycle manufacturers' custom requirements
- Sulphate Stop additive to protect against undercharging damage

## YuMicron® series

YuMicron batteries are designed to meet the special demands of personal watercraft, snowmobiles and ATVs. Dependable power, reduced maintenance and longer life plus a unique power boosting design makes the range ideal for touring bikes and modified vehicles.

- High cranking power - constructed with special thin plate separators
- Low maintenance, water loss & self-discharge with easy access vent plug design
- Heavy-duty glass mat technology for high vibration resistance
- Heat sealed case to protect against seepage & corrosion

## 6 Volt & 12 Volt conventional series

A rugged, dependable battery engineered to withstand vibration and deliver reliable cranking power.

- High cranking power - constructed with special thin plate polyethylene separators
- Engineered to protect against corrosion & vibration damage
- Easy access vent plug design for maintenance

# Motorcycle & powersport battery features

Feature	Benefit
Factory activated	Filled, sealed and charged at the factory, these batteries are maintenance free and do not require filling before installation.
Dry-charged, with acid pack	Indefinite shelf life until activation. Acid pack provided for increased convenience.
Dry-charged, no acid pack	Indefinite shelf life until activation.
Maintenance free design <sup>†</sup>	Once activated these batteries do not require refilling and remain maintenance free for the life of the battery.
Low maintenance design	Water can be replenished to extend battery life.
Lead-Calcium technology	Delivers improved CCA, reduced water loss and self-discharge.
Lead-Antimonial technology	Longer life, charge acceptance and improved corrosion resistance.
Expanded plate grid design	Superior cranking performance and rechargeability.
Radial plate grid design	Increased conductivity for higher starting power and superior vibration resistance.
Cast plate grid design	Severe vibration resistance and improved conductivity.
Extra battery plates	Additional plates for increased power.
Taller plates	Extra surface for increased power.
VRLA (Valve Regulate Lead-Acid) battery	Valve relieves excess pressure to prevent bursting. Once activated these batteries do not require refilling and remain maintenance free for the life of the battery.
Advanced AGM (Absorbed Glass Mat) separator	Absorbs the acid while creating cell compression for extreme vibration resistance.
Polyethylene separator with glass mat	Constrain the paste into the plate for improved durability, longer life and increased vibration resistance.
Sulfate Stop additive	Curbs plate sulfation and provides longer life.
Flame arrestor	Flame arrestor prevents sparks entering the battery, reducing the risk of an explosion.
Through partition construction	Shorter current path for increased electrical conductivity and higher starting currents, heavier parts for maximum durability.
Polypropylene case	Superior resistance to gasoline and oil, impact resistant in extreme weather conditions.
Thermal bonded plastic	Air tight seal to prevent air ingress & acid seepage.
Patented poly-seal terminal	Eliminates acid seepage, reduces corrosion.
Mounting angle	Extreme mounting angle capability ensures coverage for a wider range of install space designs

# Motorcycle & powersport battery construction

Yuasa powersports batteries are precision engineered from premium materials to deliver exactly what enthusiasts want: maximum starting power, superior performance and longer life!

- 1** Built-in brass nuts
- 2** Large, heavy-duty flush terminals
- 3** EZ grip cover
- 4** Safety valve / flame arrestor
- 5** Heat bonded cover
- 6** Taller plates
- 7** Through partition construction
- 8** Enhanced active material
- 9** Absorbed Glass Mat (AGM) separators
- 10** Protective separator material

## The original powersport battery part numbers

As the original motorcycle battery manufacturer, the part numbers YTX, YTZ and GYZ are registered trademarks of GS Yuasa International Ltd. They should only ever be used on genuine Yuasa or GS batteries.

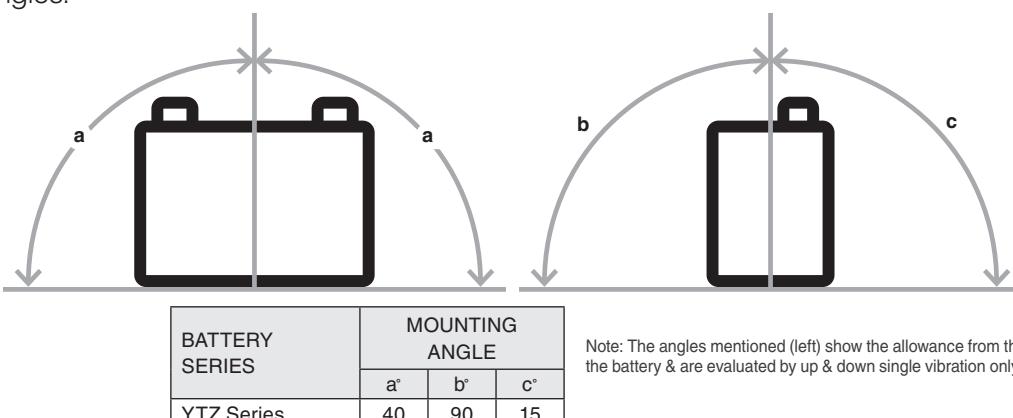

Because GS Yuasa have been OE supplier to all major motorcycle manufacturers, and the worldwide market leader for decades, these references have become industry standard. They are often used by other manufacturers and resellers in breach of GS Yuasa's trademark.

## GS Yuasa trademarks

**YTX®** **GYZ®**  
**YTZ®**

## YTZ mounting angles

Because of their unique spill proof design, Yuasa YTZ batteries can be installed under multiple mounting angles:

DC = Dry charged (acid pack not included) CP = Combi pack (acid pack included) WC = Wet charged (filled & ready to fit)

(i) Includes 20mm spacer required when replacing YB16CL-B.

\* CCA (Cold Cranking Amps) rating is for reference only. CCA is a theoretically calculated value. Actual performance may vary due to test conditions.
